

## **Enriched Soil**

Enriched Soil is a sandy loam engineered soil for use under sod installations and tree and shrub planting. This soil blend is composed of sandy loam field soil enriched with composted organic blend.

### **Typical Analysis:**

- Contains >5% organic matter by weight
- pH 6.8 to 7.8
- EC: <2.0 mS/cm

### **Recommendations:**

It is highly recommended, as with any soil, that plants are watered regularly to ensure optimum moisture content.
