

CEDAR MULCH

Technical Data Sheet

Hermanns Cedar Mulch is a mix of natural cedar bark and wood, with a soft fibrous texture that knits together to protect the soil from erosion and to improve moisture retention.

- Double shredded cedar mulch
- Dark brown in colour that greys as it ages
- Fresh cedar aroma
- Enhances moisture retention
- Suppresses weed growth

TYPICAL ANALYSIS:

pH	5.5 – 7.0
Moisture Content	45% to 55%
Organic Matter Content	70 - 85% by weight (dry)
Minimum Size Gradation	97% < 25mm Minimum 66% < 5/8"
